SAFETY DATA SHEET (SDS) Non-Ferrous Alloys

Aluminum Bronze Castings, Extrusions, and Forgings

No. J79-191, Rev. H

Dated 30-07-2015

SECTION 1: PRODUCT IDENTIFICATION

Product Identifier: Aluminum Bronze Castings, Extrusions, Forgings, Safety Tools

Manufacturer’s Name:
AMPCO METAL S.A.
Route de Chesalles 48
P.O. Box 45
1723 Marly 1
Switzerland

E-Mail: info@ampcometal.com
Website: www.ampcometal.com

Contact / Telephone number (non emergency)
+41 26 439 93 00

Material Name:
Copper Base Alloy Castings, Extrusions, Forgings, Rods, Bars, Tubes, Shapes, Flat Products, Scrap Materials, and Safety Tools.

These materials are commonly referred to as High-Copper Alloys, Aluminum Bronzes, Silicon Bronzes, Manganese Bronzes and Copper-Nickel Alloys.

SECTION 2: HAZARDS IDENTIFICATION

Hazard Classification
This product is exempt from classification according to the OSHA Hazard Communication Standard (CFR 1910.1200) since it is an article as sold and under normal conditions of use.

Label Elements
Signal Word Not applicable
Symbols Not applicable
Pictograms Not applicable

Hazards Not Otherwise Classified
Dust or fumes generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the casting may produce airborne contaminants (see Section 8) that are hazardous.

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

Individual AMPCO Alloy compositions are shown on the Certification of Chemical and Mechanical Properties, when supplied, or may be found in AMPCO promotional literature.

Elements having a listed percentage greater than zero will be present in all alloy grades. Elements having percentages starting with zero may not be present in certain alloy grades.

* This constituent, a toxic chemical, makes this product subject to the reporting requirements of Section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40CFR Part 372. Quantity threshold for this chemical, below which reporting of releases is not required, is 25,000 pounds.

** This constituent is reportable only if in the form of dust or fume.

Note: Chromium, lead and nickel have been identified as potential human carcinogens. This material is classified as not hazardous under OSHA regulations

**SECTION 4: FIRST AID MEASURES**

**Eye Contact**
No need for first aid is anticipated under normal use conditions

**Inhalation**
No need for first aid is anticipated under normal use conditions.
If symptoms develop following exposure to fumes or dusts released from the processing of the casting (e.g. machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting), immediately remove person from exposure. Seek medical attention if symptoms persist.

**Skin**
No need for first aid is anticipated under normal use conditions.
Vacuum off excess dust. Wash well with soap and water. Avoid blowing particulate into the atmosphere. Contact with these alloy grades in the molten condition will cause severe burns. Get medical attention.

**Ingestion**
No need for first aid is anticipated under normal use conditions.
Seek medical attention if large quantities of material have been ingested.

**Most Important Symptoms and Effects, both Acute and Delayed**
None expected under normal conditions of use.
Dust or fumes generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the casting may produce airborne contaminants (see Sections 8 and 11) that are hazardous.

**Indication of Immediate Medical Attention and Special Treatment Needs**
Not applicable

**SECTION 5: FIRE FIGHTING MEASURES**

**Suitable Extinguishing Media**
Use suitable extinguishing methods for surrounding fire

**Special Hazards Arising from the Substance**
Not applicable

**Special Protective Actions for Fire Fighter**
Not applicable

**SECTION 6: ACCIDENTAL RELEASE MEASURES**

**Personal Precautions, Protective Equipment and Emergency Procedures**
No special measures required
Environmental Precautions
Not applicable

Methods and Material for Containment and Clean-up
Not applicable

SECTION 7: HANDLING AND STORAGE

Precautions for Safe Handling
No special requirements.

Conditions for Safe Storage, Including Any Incompatibilities
No special storage requirements.

SECTION 8: EXPOSURE CONTROLS AND PERSONAL PROTECTION

Occupational Exposure Limits
Dust or fumes generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the casting may produce airborne contaminants with the following Occupational Exposure Limits (OELs):

</table>
based on the form and concentration of the contaminant in air exceeding the applicable exposure limits. In these cases a NIOSH approved respirator should be selected.

Appropriate Engineering Controls

In the solid state, no special requirements are necessary. If processes such as machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting are used on the casting, local exhaust ventilation may be required to maintain concentrations of airborne hazardous ingredients below the applicable exposure limits.

Personal Protective Equipment

Eye Protection
Wear safety glasses with side-shields if there is a risk of particles getting in eyes.

Skin Protection
No chemical protective clothing is required. If material is processed, use appropriate protective clothing and gloves for the application.

Respiratory Protection
In the solid state, no special requirements are necessary. Airborne dust or fumes can be generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the castings. Respiratory protection may be necessary if concentrations of these hazardous ingredients exceed the applicable exposure limits. In these cases a NIOSH approved respirator should be selected based on the form and concentration of the contaminant in air.
SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

Appearance  
Solid, Golden or copper colored material

Odor  
Not applicable

Odor threshold  
Not applicable

pH  
Not applicable

Melting Point  
1742-2050º F (950-1121º C)

Initial boiling point & boiling range  
Not applicable

Flash Point  
Not applicable

Evaporation Rate  
Not applicable

Flammability  
Not applicable

Upper/Lower flammability or explosive limits  
Not applicable

Vapor Pressure  
Not applicable

Vapor Density  
Not applicable

Relative Density  
Not applicable

Solubility in Water  
Not applicable

Partition Coefficient  
Not applicable

Auto-Ignition Temperature  
Not applicable

Decomposition Temperature  
Not applicable

Viscosity  
Not applicable

SECTION 10: STABILITY AND REACTIVITY

Reactivity  
Inert, not reactive

Chemical Stability  
Stable

Possibility of Hazardous Reactions  
Will not occur

Conditions to avoid  
None known

Incompatible Materials  
None known

Hazardous Decomposition Products  
None expected under conditions of normal use.

SECTION 11: TOXICOLOGICAL INFORMATION

This product as sold is an article but processing may release hazardous substances. Information about these components is supplied.

Acute Toxicity
Copper  
Eye and respiratory irritation may occur. High exposure to copper dust may cause gastrointestinal effects due to oral ingestion.

Nickel  
One study showed severe lung and kidney damage following exposure to extremely high levels of nickel powder.

Skin Corrosion / Irritation
None expected

Serious Eye Damage or Irritation
None expected
Respiratory or Skin Sensitization
Cobalt  May cause allergy or asthma symptoms or breathing difficulties if inhaled. Contact allergic dermatitis may occur.
Nickel  Contact allergic dermatitis may occur.

Germ Cell Mutagenicity
Nickel  Chromosomal aberrations and in vitro and in vivo testing has shown that nickel is genotoxic (ASTDR)

Carcinogenicity
Aluminum  Not listed by IARC, NTP or OSHA
Cobalt  Listed by IARC (possibly carcinogenic to humans-Group 2B). Not listed by NTP or OSHA.
Copper  Not listed by IARC, NTP or OSHA
Iron  Not listed by IARC, NTP or OSHA
Manganese  Not listed by IARC, NTP or OSHA
Nickel  Listed by IARC (possibly carcinogenic to humans-Group 2BA) and NTP (known to be a human carcinogen). The strongest evidence for carcinogenicity is for sulfidic nickel forms and the evidence for oxidic forms of nickel are the weakest. There is no evidence that metallic nickel is associated with nasal or lung cancer (ASTDR).

Reproductive Toxicity
None expected

Specific Target Organ Toxicity-Single Exposure
Copper  A few studies have shown copper to cause metal fume fever, a condition characterized by chills, fever, muscular pain, nausea, and vomiting but these are limited in number and details. Studies have reported upper respiratory tract irritation, metallic taste sensation and nausea.
Nickel  One study showed severe lung and kidney damage following exposure to extremely high levels of nickel powder.

Specific Target Organ Toxicity-Repeated Exposure
Aluminum  There is some evidence that aluminum may accumulate in the body with long-term exposure. Lung changes have been reported in workers exposed to high levels of aluminum dust. Some studies have indicated that there may be subtle neurological effects following long-term exposure to aluminum.
Cobalt  Animal studies have shown respiratory effects following inhalation exposure (lung edema, decreased pulmonary function). Transient myocardial changes have also been reported. Studies have shown asthma and pulmonary function changes in workers in the cemented tungsten carbide industry and cobalt is thought to play a significant role in these effects although it is not the only substance these workers were exposed to.
Iron  Prolonged exposure may lead result in iron deposits in the lung, a condition known as siderosis
Manganese  Inflammatory changes in the lung were found in monkeys exposed to manganese dioxide via inhalation for 10 months. At high exposure levels (greater than 5 mg/m3), manganism (chronic manganese poisoning) has been reported in workers. Symptoms of manganism include sleepiness, weakness in the legs, a mask-like facial appearance, emotional disturbances and a spastic gait. High levels of pneumonia have also been reported in workers inhaling large amounts of manganese dust and fume. In some studies, manganese has been associated with longer reaction times, hand steadiness and eye-hand coordination. Effects appear to be more pronounced with exposures to respirable sized particles.
Nickel (elemental and nickel oxide)  Animal studies have shown lung changes and inflammation.
Aspiration Hazard  Based on the physical form, the product is not expected to be an aspiration hazard.
SECTION 12: ECOLOGICAL INFORMATION

Toxicity
Eco toxicity is expected to be minimal since the casting is a solid with low water solubility.

Persistence and Degradation
Not applicable

Bioaccumulation
Not applicable

Mobility in Soil
Not applicable

Environmental Fate
Not applicable

SECTION 13: DISPOSAL INFORMATION

This product is not considered to be hazardous waste according to US RCRA and Canadian regulations. Recover or recycle if possible. Dispose of according to federal, state and local regulations. Dust collected from casting processing operations (e.g. machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting) may be classified as a hazardous waste. Consult federal, state and local regulations.

SECTION 14: TRANSPORTATION INFORMATION

U.S. Department of Transportation (DOT) Product is not regulated
International Maritime Dangerous Goods (IMDG) Product is not regulated
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code Product is not regulated
International Civil Aviation Org. / International Air Transport Assoc. (ICAO/IATA) Product is not regulated

SECTION 15: REGULATORY INFORMATION

If this product is reformulated or further processed, the regulatory status of the components listed in the composition section of this sheet may be altered. The following regulatory information may not be complete and should not be relied upon as the sole source of information regarding regulatory responsibilities.

Occupational Health and Safety Administration
This product is an article as sold. Dust or fumes generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the casting may produce airborne contaminants that are regulated by OSHA.

TSCA Chemical Inventories
This product is an article as defined by TSCA regulations, and is exempt from TSCA Inventory listing requirements

CAS: Chemical Abstract Service - Registry Number
EINECS - European Inventory of Existing Commercial Chemical Substances
CERCLA RQ (reportable quantity) - if a value is listed then releases of particles, ≤ 100 μm in size, to the environment may require reporting under CERCLA Sections 102-103 (40 CFR Part 302)
Section 313 - if '313' is listed then may be subject to the reporting requirements found under EPCRA Section 313 (40 CFR Part 372)

NPRI (National Pollutant Release Inventory) Threshold Category - if 1A or 1B is listed, may be subject to reporting under the Canadian Environmental Protection Act, 1999

California Prop 65 - if listed WARNING: This product contains chemicals known to the State of California to cause cancer.

These products are not believed to contain any substances that meet the notification requirements found under EPCRA Sections 302 or 304 (40 CFR Part 355) nor subject to the accidental release prevention requirements under CAA 112(r) (40 CFR Part 68).

SECTION 16: OTHER INFORMATION

This MSDS is intended to be used as a guide to the appropriate handling, storage, and use of this product by an adequately trained person. AMPCO METAL S.A. is not responsible for the misuse, mishandling or improper storage of this material by the user. This product is exempt from classification according to the OSHA Hazard Communication Standard (CFR 1910.1200) since it is an article as sold and under normal conditions of use.

Dust or fumes generated by machining, grinding, sawing, blasting, polishing, buffing, brazing, soldering, welding or thermal cutting of the casting can produce airborne contaminants that are hazardous. Consult the Safety Data Sheet (SDS) for this product for further information.

WARNING: This product contains chemical(s) known to the State of California to cause cancer.
